Professional Summary

Computer Science graduate (fresher) with hands-on experience in Linux, Python, SQL, client-server systems, and hardware/IoT integration, and a strong interest in system administration. Experienced in setting up and configuring software and devices, working with databases and networked services, and supporting users by understanding their issues and delivering reliable solutions. Quick to learn new tools and comfortable working methodically with systems and technical problems.

Technical Proficiencies

Systems & Administration: Linux, Troubleshooting, Software & Hardware Setup, User Support, Requirements & Workflow Analysis
Networking & Servers: Client-Server Architecture, REST APIs, WebSockets, Flask Backend Services, RF Communication
Hardware: ESP32 Microcontroller Integration, IoT Device Control
Databases & Languages: SQL, Python, C
Tools: Git, GitHub, Figma, Unity 3D
Web Technologies: HTML, CSS, React, Bootstrap
AI: OpenCV, MediaPipe, Machine Learning Fundamentals

Education

Saintgits College of Engineering, Kottayam, India 2022 – 2026
B.Tech in Computer Science CGPA: 7.27

National Chung Cheng University, Chiayi, Taiwan 2025
Exchange Program in CSIT

VR Appu Memorial Higher Secondary School, Thrissur, India 2021 – 2022
Higher Secondary Education Percentage: 92%

St. Joseph's Higher Secondary School, Thrissur, India 2020
Secondary Education Percentage: 94%

Experience

Web Development Intern — AT Bots May 2026 – June 2026

- Worked directly with clients to understand their needs, clarify requirements, and address feedback so delivered interfaces met expectations.
- Built and adjusted web interfaces based on client feedback, communicating progress and changes clearly.

Graphic Designer Intern — GroHub Jun 2024 – Oct 2025

- Designed visual assets and marketing materials for digital platforms, working to briefs and deadlines.

AR Developer Intern — ARK Infosolution Pvt. Ltd., Kottayam Feb 2024

- Set up and worked with Unity 3D and the Vuforia SDK to develop AR applications with real-world object tracking.
- Built mini-games with interactive animations.

UI/UX Intern — KELTRON, Kochi Aug 2023

- Designed responsive interfaces for internal tools using HTML, CSS, and Bootstrap.
- Created interactive mockups to improve usability for internal users.

Projects and Research

Eye-Cue: Real-Time Eye Blink and Gaze Communication System

- Architected a full-stack client-server system using OpenCV and MediaPipe for real-time gaze and blink detection.
- Built a Python Flask backend using WebSockets for real-time alerts to a React dashboard and REST APIs for IoT hardware control.
- Integrated and configured an ESP32 microcontroller for device control and designed a fault-tolerant RF backup channel for critical offline alerts.

Clinical Voice-DB: Patient Management System

- Developed a centralized database to track patient history and daily recovery goals.
- Integrated voice-to-text processing to convert spoken prescriptions into structured database records, reducing manual entry.

College Club Management System — Flask, JavaScript, SQL

- Developed a full-stack platform with an SQL database to manage student clubs and events, improving coordination across 5+ organizations.

Design Science in Law Enforcement — Research Project

- Proposed enhancements to traffic violation detection using computer vision and design science methodology.

Certifications

- Introduction to Machine Learning — NPTEL (2024)

Minor Program

Robotics Engineering Feb 2024

- Studied robotics fundamentals, industrial automation, and AI/ML applications in robotics.

Extracurricular Activities

- **Creative Officer, IEDC@Saintgits:** Led visual design and coordinated multiple entrepreneurship events.
- **Team Lead, Design Teaser, Nakshatra Tech Fest:** Directed branding and content creation for a national-level event with 500+ attendees.
- **Member, EXCEL Computer Science Club:** Participated in coding contests and technical workshops.
